Claim 5, line 1: Change "any one of claims 1" to --claim 1--.

Claim 5, line 2: Delete "through 4".

Claim 9, line 2: Delete "or 8".

Please add the following new claims:

-- 11. A computer according to claim 2, wherein said processor determines priorities specific to each of said plurality of operating systems o the basis of the priorities common to said operating systems, thereby changing the priorities of said plurality of processes or threads to be performed by each of said operating systems.

--

-- 12. A computer according to claim 11, wherein said memory comprises a priority reverse translation table in which to map said common priorities into the priorities specific to each of said operating systems, and wherein said processor changes the priorities of said plurality of processes or threads on the basis of said priority reverse translation table.--

-- 13. An operating system execution method according to claim 8, wherein said priority translating step, besides translating priorities of processes or threads to be performed by each of said operating systems into the common priorities, translates at least an interrupt handling state, a self-processing state of any operating system, and an idle state into common priorities.--
